

RAG on Azure - Test Document

This is a small sample PDF for testing the RAG pipeline.

Azure OpenAI provides both chat completion models and text embedding models through named deployments.

Azure AI Search stores document chunks along with their vector embeddings, and supports hybrid keyword plus vector search.

Azure Blob Storage is used to keep the original uploaded PDF file safe, separate from the search index.

The capital of France is Paris. The company Contoso was founded in the year 2010 and specializes in cloud consulting services.

This document is intentionally short to minimize token usage during testing on a free tier Azure subscription.
